SOLUTION BRIEF

HARNESS THE POWER TO DEFINE AND DEPLOY YOUR OWN SECURE PAYMENTS

Consumers are looking for the sleek convenience of in-store mobile payments. As payment technology evolves, issuing banks must maintain trust while providing a frictionless user experience. Verimatrix Mobile Payment offers integrated tokenization and a customizable white label application for a branded service, so banks can give their users the experience they expect.

Easy Integration with Visa and Mastercard
Deploy quickly with the world's most widely used payment cards. Verimatrix Mobile Payment is integrated with the token services from Mastercard and Visa, and the solution is approved against their cloud-based payments specifications.

Enhance Security and User Experience
Verimatrix Mobile Payment helps issuing banks strike the right balance between security and user experience. Tokenization enables seamless payments and protects data by replacing a cardholder's information with digital tokens.

Keep Control by Deploying On-Premise
Banks can deploy the server within their own data centers, giving them complete control. Verimatrix's Mobile Payment Server is Mastercard and Visa approved – for functionality, integration and security. Banks will have confidence that their Mobile Payment Server is highly secure, easy to connect and rapid to deploy.
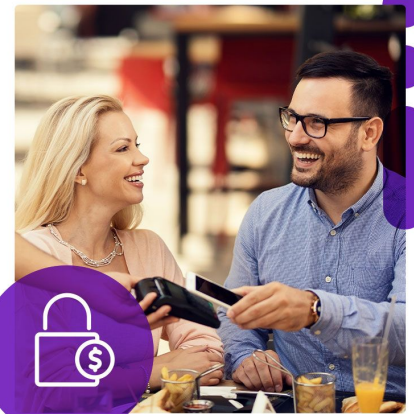

Exceptional User Experience
Verimatrix Mobile Payment solutions are proven in the finance market where robust security must be perfectly balanced with frictionless payment experiences.

Driving Trust for 20 Years
As industry experts with two decades of experience, many of the world's largest financial institutions trust Verimatrix to protect the systems people depend on every day.

Award-Winning Customer Support
Benefit from award-winning 24/7/365 worldwide customer support. With a stellar customer satisfaction score of 99% and numerous honors from The Stevie® Awards for Sales & Customer Service program recognizing the company's commitment to clients, trust that your partnership will be highly valued.

CREATE FRICTIONLESS, SECURE MOBILE PAYMENTS WITH ROBUST TOOLS

Deploy On-Premise for Total Control
Issuing banks can deploy the server within their own data centers to gain complete access and control, using their own security protocols and procedures.

SDK Option
Reduce time spent on coding homespun wallets, scheme certification and testing with an SDK that enables a smooth integration with banking apps.

Client and Server Solutions
Verimatrix Mobile Payment offers a full client and server solution for Token Requestors (Wallet Providers), enabling end-to-end, comprehensive security.

White Label Application
Enjoy the freedom & flexibility to customize your solution and accelerate your own branded Mobile Payment services to give users the experience they expect.

Mastercard Engage Gold Partner
Mobile Payment is integrated with Mastercard Digital Enablement Service (MDES), so issuers won't need to configure their own card portfolio for digitization.
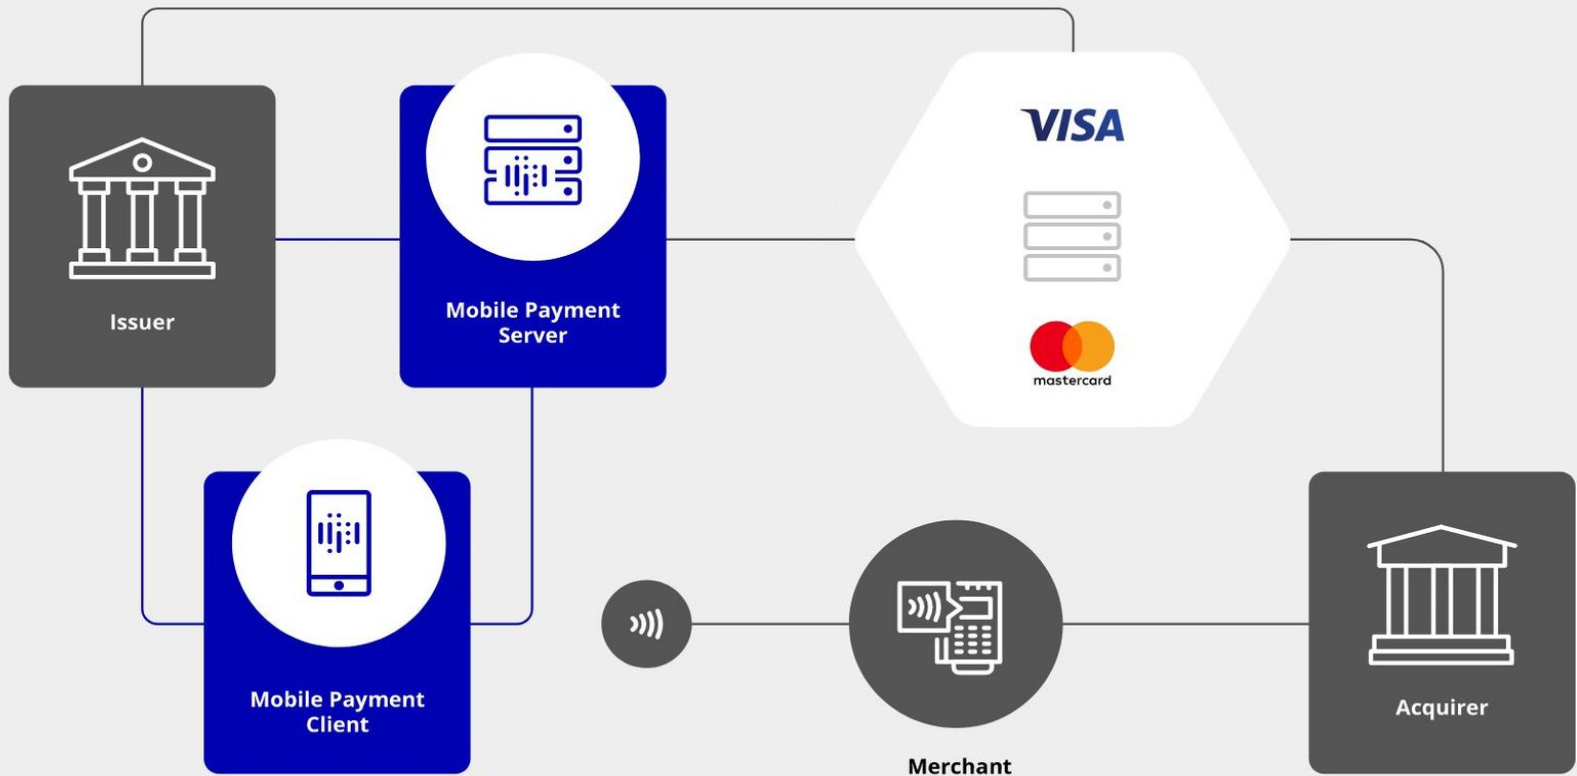

Visa Ready
Integrated with Visa's Token Services, issuing banks and merchants can get up to speed quickly with the world's largest electronic payment network.

About Verimatrix
