Designed for a global partner ecosystem.

Video service operators and content providers can deliver live & premium content on any device while also reducing friction and customer churn.
EASILY REDUCE FRICTION WITH A COMMON USER AUTHENTICATION SYSTEM

See significant improvement in customer retention with Verimatrix’s TV Everywhere Authentication

The complex web of secure connections between video service operators and content owners/providers means that subscribers must seek password access to rights repeatedly. This creates a disjointed and frustrating user experience, ultimately leading to costly churn.

Verimatrix TV Everywhere Authentication (formerly nTitleMe) solves this problem by streamlining the process with a single integration for secure subscriber authentication and content authorization.

Scale as You Grow

Deploy a TV Everywhere service with the ease that consumers want and expect. Verimatrix TV Everywhere Authentication makes the subscriber value proposition “stickier” while ensuring future scalability. Quickly connect compelling content with audiences anywhere, anytime.

Driving Trust for 20 Years

As industry experts with more than two decades of experience, many of the world’s largest content owners and service providers trust Verimatrix to protect the systems people depend on every day.

Ensure a Seamless User Experience on Any Device

Delivering a superior user experience for premium movies, live sports, games, TV shows and e-sports across multiple devices other than the family-room TV is critical. Consumers are more likely to abandon a service if they cannot easily enjoy their content.

Scale with Ease During Popular Live Events

Using the Verimatrix Secure Cloud, ensure agility even during popular live events with millions of simultaneous viewers and authentication requests. Scale up or down as needed, while also achieving geographic diversity.

One Single Integration for a Global Partner Ecosystem

Pre-integrated with 500+ global video service operators through direct connection or via major proxies, Verimatrix TV Everywhere Authentication can dramatically reduce your time-to-market. A standards-based set of APIs allows you to quickly update and manage subscriber entitlements to support new business relationships.
A Single Integration for Secure Subscriber Authentication and Authorization

# Verimatrix TV Everywhere

Scalable, Frictionless Authentication

## Single Sign-On
Verimatrix TV Everywhere minimizes obstacles to viewing through geo-targeted, single sign-on as well as device-shifting technology.

## Supports Open Standards
Keep authentication and authorization secure, lightweight and reliable with a flexible solution that supports open standards like SAML and OAuth2.0.

## Comprehensive Security
Achieve total content security and grow your business with a suite of multi-DRM, video analytics and software shielding technology.

## Large Partner Ecosystem
Verimatrix TV Everywhere is pre-integrated with 500+ video service operators through direct connection or via major proxies.

## Easy Integration
Leverage a common framework with a single integration for device-agnostic subscriber authentication & authorization.

## Geographic Diversity
Customize your user experience with technology that helps you tailor content packages by region.
