

Secure your Android & iOS apps in minutes.

Enterprise-level app protection, simplified.

Verimatrix
App Shield

ENTERPRISE-LEVEL PROTECTION FOR MOBILE APPS IN MINUTES

Verimatrix App Shield is an award-winning cloud service relied upon by mobile app developers worldwide. With no code changes required, developers simply upload their final app for protection and receive a secured version back -- ready to publish to the app stores. It's that simple.

Leverage Robust, Self-Defending Security

When your app is protected by Verimatrix's App Shield, it will respond immediately to threats and defend itself. Inject automated anti-tamper technology, environmental checks and code obfuscation into your apps to safeguard them from a wide range of attacks.

Avoid Human Error with Unparalleled Protection

Verimatrix App Shield applies a unique automated and intelligence driven process, which removes the risk of human error creating weak or unchecked areas in your app. No specialist security knowledge is required. This also enables a large application to be protected as easily as a simple test app.

Instant Protection with No Code Required

App Shield is a cloud service that offers unprecedented protection in minutes, with no integration required. Simply upload your final app for protection and receive a secured version back – ready to publish to the app store of your choice within 10 minutes.

**Intelligent analytics & real-time automated response features coming soon.*

Powerfully Protect

It does this by injecting powerful in-app protection directly into your app package (Android APK and iOS xcarchive) without affecting any of your software's functionality.

As our mobile app shielding becomes part of your app, it stays protected even if you stop using the Verimatrix service.

This means you can even safely publish an app protected during your free trial.

Consistently Monitor

Our intelligent analytics perform early detection and alert when hackers attempt to attack your application.

Verimatrix helps you understand the threat profile of your install base and drills down into the risk score of an individual app instance.

Get real time notifications of high-risk events within your ecosystem.

Immediately Act

Get real-time automated responses to mitigate attacks and resolve security threats that could affect your application.

When the protected app detects it is under attack, it immediately terminates its own operation, shutting down the threat.

Based on your business needs, define rules for how your apps should react when they encounter a high-risk scenario.*

**Intelligent analytics & real-time automated response features coming soon.*

#VerimatrixAppShield

Protect Your Apps from a Wide Range of Threats:

Dynamic Modification - App Shield keeps hackers from modifying code and circumventing security measures so they cannot gain access to valuable data.

App Repackaging - Prevent criminals from repackaging your applications and publishing imposter versions in app stores.

Emulators & Debuggers - Protect your applications from attackers using emulators and debuggers to intercept data before it is encrypted.

Reverse Engineering - Layered security and multiple automated checks greatly hinders a wide variety of reverse engineering attempts.

Jailbroken Devices - Automated detection of jailbroken and rooted phones is critical to ensure that your code is executing exactly the way you want it to.

About Verimatrix

Verimatrix (Euronext Paris: VMX) helps power the modern connected world with security made for people. We protect digital content, applications, and devices with intuitive, people-centered and frictionless security. Leading brands turn to Verimatrix to secure everything from premium movies and live streaming sports, to sensitive financial and healthcare data, to mission-critical mobile applications. We enable the trusted connections our customers depend on to deliver compelling content and experiences to millions of consumers around the world. Verimatrix helps partners get to market faster, scale easily, protect valuable revenue streams, and win new business. To learn more, visit www.verimatrix.com.
