Your Apps Are Under Attack, Fight Back with the Best Defense

Protect your code, data, and brand
with the world's #1 enterprise-grade mobile app protection,
threat detection, and response platform

Verimatrix XTD

PRODUCT BRIEF

VERIMATRIX XTD: SEAMLESS & STRONG CYBERSECURITY FOR A CONNECTED WORLD

In today's digital world, businesses rely on mobile apps, cloud services, and connected devices to operate efficiently. Sadly this digital expansion also increases security risks. Hackers exploit weaknesses in apps and networks to steal data, disrupt services, and damage brand reputations.

What if your cybersecurity could be both seamless and powerful?

Meet Verimatrix XTD

Verimatrix XTD (Extended Threat Defense) is a cybersecurity solution designed to safeguard businesses from modern cyber threats. Unlike traditional security solutions that focus only on networks and endpoints, **XTD extends protection to mobile applications, cloud-based services, and both managed & unmanaged devices**—where businesses are often most vulnerable. Our AI-powered technology detects and neutralizes attacks in real time—before they can cause harm.

Whether your business relies on mobile apps or web services, **XTD provides seamless, scalable protection.**

Verimatrix XTD at a glance

CORE PROTECTION
Safeguards mobile apps, web services and data from cyber threats, ensuring comprehensive security.

CLEAR VISABILITY & TOTAL CONTROL
Intuitive dashboards deliver deep insights into threats, app activity, and device integrity, enabling proactive responses with measures like remotely shutting down compromised app instances.

BUILT FOR
Businesses heavily reliant on mobile apps and digital platforms, protecting their most critical touchpoints with customers.

POWERED BY
AI, automation, and expert monitoring, offering real-time defense against evolving threats.

WHY IT'S STANDS OUT
Unlike traditional security solutions, XTD extends protection beyond the network perimeter to mobile apps and both managed and unmanaged devices, ensuring security at every level.

DRIVING TRUST

WHY CHOOSE VERIMATRIX XTD?

Verimatrix XTD is an **AI-powered cybersecurity solution** offering real-time protection **for mobile apps, web platforms, cloud services, and enterprise networks.** Its seamless integration with existing IT infrastructures ensures scalable, proactive security that evolves with your digital needs. By continuously analyzing and adapting to emerging threats, Verimatrix XTD provides advanced, adaptive protection and built-in compliance for modern digital environments.

Key Features:

AI-Powered Threat Detection
Instantly detects and blocks threats.

End-to-End Protection
Secures apps, data, and devices across all platforms.

Adaptive Security
Customizes protection based on your evolving needs.

Seamless Integration
Integrates effortlessly with existing development and management tools.

Compliance Ready
Meets GDPR, HIPAA, PCI-DSS, and more.

XTD Platform
AI-powered, cloud-based platform for proactive, multi-layered protection.

HOW VERIMATRIX XTD PROTECTS YOUR BUSINESS?

Verimatrix XTD provides continuous, **automated threat detection and response** to protect your business in real-time. By using **advanced AI and machine learning**, it analyzes security signals across environments to identify emerging threats and take proactive action. It also adapts to your **business's specific requirements**, integrating smoothly with your existing security infrastructure for frictionless deployment.

Key Capabilities:

Real-Time Threat Detection & Intelligence
Continuously scans and responds to over 50 security signals, providing immediate action against threats.
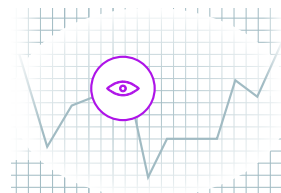

Dynamic Protection
Customizes security responses according to your unique business needs, ensuring that defenses are always aligned with evolving risks.

Quick, Non-intrusive Setup.
Easily integrates with your existing infrastructure for a fast and smooth deployment.

AI-Driven Insights & Threat Intelligence
Machine learning detects evolving attack patterns, providing actionable intelligence.

DRIVING TRUST

VERIMATRIX XTD:
COMPREHENSIVE PROTECTION ACROSS ALL ENVIRONMENTS

The Verimatrix XTD provides **scalable cybersecurity** for mobile apps, web services, embedded systems, and digital infrastructure across **cloud, on-premises, and hybrid environments.** With AI-driven threat detection, real-time responses, and advanced encryption like white-box cryptography, it ensures robust protection against evolving threats.

### XTD Protect: Advanced Security for Apps & Systems

XTD Protect secures mobile apps, web services, and embedded systems from threats like reverse engineering, code tampering, and data theft. It shields applications from runtime threats and prevents unauthorized access.

- **Mobile & Web Security:** Protects against code tampering and reverse engineering.
- **Runtime Threat Protection:** Safeguards apps from data breaches.
- **Anti-Tamper & Code Obfuscation:** Prevents exploitation of app vulnerabilities.

XTD Detection & Response: AI-Powered Threat Detection

XTD Detection and Response is designed to continuously monitor and safeguard against diverse threats facing mobile apps.

- **Proactive Detection:** Identifies and alerts on suspicious activity and anomalies across all connected devices.
- **Rapid Response:** Quickly mitigates threats with automated and manual intervention options.
- **AI-Based Threat Detection:** Utilizes an AI-driven engine to enhance threat detection capabilities.

verimatrix
DRIVING TRUST
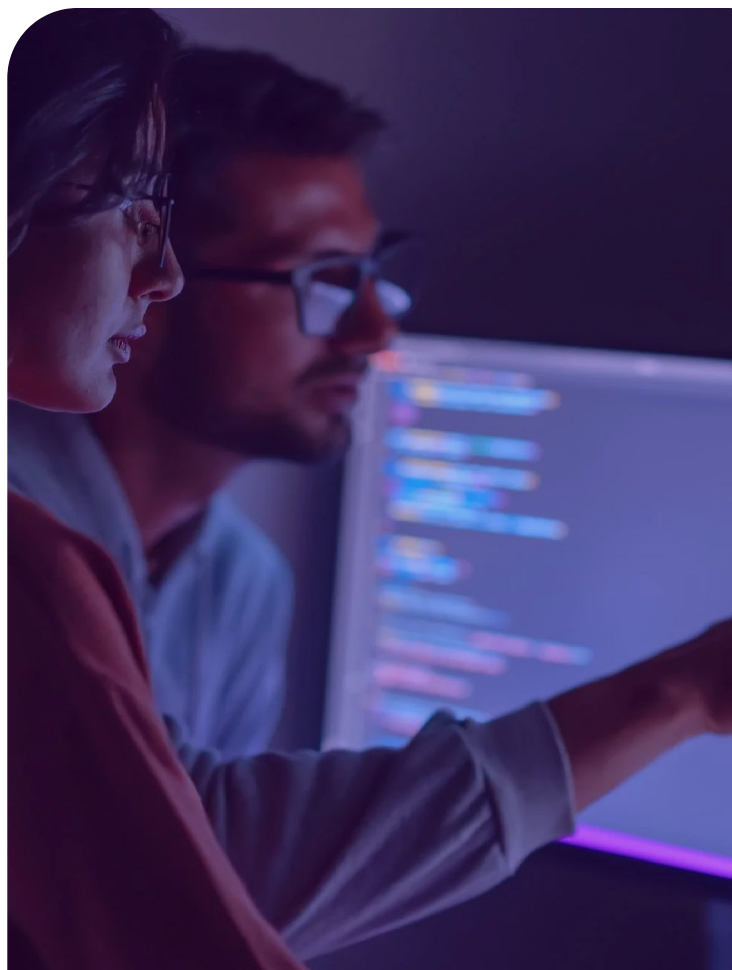

XTD for Web: Protecting Web Applications

XTD for Web defends against common cyberattacks like SQL injection, XSS, and session hijacking, ensuring the safety of online platforms.

- **Web Protection:** Defends against common vulnerabilities.
- **Data Integrity:** Secures sensitive user data.
- **Proactive Defense:** Continuously monitors and adapts to new web-based threats.

XTD Whitebox Cryptography: Advanced Data Encryption

XTD Whitebox Cryptography protects encryption keys with advanced techniques, ensuring the confidentiality of sensitive data and regulatory compliance.

- **Whitebox Cryptography:** Prevents key extraction even under attack.
- **Data Protection:** Secures data during storage and transmission.
- **Advanced Key Management:** Safeguards encryption keys from compromise.

XTD Managed Services: 24/7 Monitoring & Expert Analysis

XTD Managed Services offers continuous monitoring and expert-led threat analysis, relieving internal teams while ensuring proactive threat detection and response.

- **24/7 Cybersecurity Monitoring:** Real-time oversight by security professionals.
- **Expert Threat Analysis:** Access to cybersecurity experts for threat management.
- **Minimized Operational Load:** Enables internal teams to focus on core tasks while experts handle security.

WHO BENEFITS FROM VERIMATRIX XTD?

Enterprises
Large organizations that need scalable, multi-layered security.

IT & Security Teams
Professionals looking for a centralized, easy-to-manage security solution.

CISOs & CTOs
Business leaders aiming to strengthen cybersecurity without added complexity.

App Developers
Teams needing automated, fast, and cutting-edge security for mobile and web applications.

Secure Your Digital Future with Verimatrix XTD

Don't wait until a cyberattack disrupts your business. The Verimatrix XTD provides a simple, powerful, and proactive approach to cybersecurity, ensuring your applications, data, and digital assets remain secure.

About Verimatrix Cybersecurity

Verimatrix (Euronext Paris: VMX, FR0010291245) secures the apps that power our digital world. The Verimatrix Extended Threat Defense platform (XTD) delivers next-generation app protection for Android, iOS, embedded, and desktop apps—blending layered shielding, adaptive AI-driven threat intelligence, real-time detection and response, and whitebox cryptography to block attacks before they happen. Built for modern development, XTD integrates seamlessly with CI/CD pipelines and SIEMs—boosting security without slowing innovation. For 30 years, global leaders have relied on us to build trusted, seamless digital experiences—without compromise. Backed by ISO-certified security, 150+ patents, and award-winning localized services in 9 countries, we protect industries like telecom, hospitality, banking, e-commerce, healthcare, and automotive from relentless cyber threats. The apps we trust need protection. Verimatrix delivers.
