Inside Secure Announces Latest Payment Card Industry Data Security Standard Certification of Its Mobile Payment Technology

Aix-en-Provence, France, October 11, 2018 – Inside Secure (Paris:INSD), at the heart of security solutions for mobile and connected devices, today announced *PCI* DSS v3.2.1 certification for its Mobile Payment Client and Mobile Payment Server. Payment Card Industry *Data Security Standard* (PCI DSS) v3.2.1 is the latest certification level from the Payment Security Standards Council.

The most rigorous certification required by credit card providers, PCI DSS compliance aims to increase payment security through industry-driven, flexible data security standards. This latest certification serves as a yet an additional layer of assurance that Inside Secure's customer data remains safe and that credit card providers trust the technology to enable sensitive financial transactions.

"Leading financial institutions around the globe, as well as other organizations that require stringent payment-related security, depend on Inside Secure every day to reliably manage their mobile payment ecosystem as well as easily integrate their solution with the Visa Token Service (VTS) and Mastercard Digital Enablement Service (MDES)," said Simon Blake-Wilson, COO at Inside Secure. "PCI DSS compliance underscores our commitment to continual innovation and holding the latest possible certifications for our products and services."

With strategic focus on SECaaS, Inside Secure continues to strengthen and improving hosted offering with PCI-DSS compliance on its mobile payment service.
