Verimatrix Introduces New Website Security Integration at Black Hat USA 2023, Expands Services

Verimatrix XTD Web Protect, powered by Reflectiz, enables customers to identify and monitor enterprise website vulnerabilities before they wreak havoc.

Aix-en-Provence, France and San Diego, USA, August 8th, 2023 – Verimatrix, (Euronext Paris: VMX), the leader in powering the modern connected world with people-centered security, today announced it will debut a newly added website security offering, Verimatrix XTD Web Protect powered by Reflectiz, at this year's Black Hat USA event taking place August 5-10.

The new website-focused security services are made possible through a strategic partnership with Reflectiz, an award-winning cybersecurity company, and will be available within the Verimatrix Secure Delivery Platform under the Extended Threat Defense (XTD) family of products. The new SaaS product offering will complement the company's existing mobile app security services – expanding the reach of Verimatrix's threat detection and response capabilities. Located in Black Hat booth 1580 at the Mandalay Bay Convention Center in Las Vegas, Verimatrix will conduct live demos of XTD for apps and XTD for websites.

Reflectiz's newly added technology enables Verimatrix to remotely and non-intrusively identify and mitigate risks associated with third-party apps and open-source tools on any website. Utilizing advanced behavioral analysis, Reflectiz's comprehensive continuous monitoring provides website owners with the confidence that their entire web supply chain is proactively analyzed and protected.

"This partnership with Reflectiz is a natural progression for the Verimatrix XTD offering, expanding our capabilities to organizations' websites that demand high levels of continuous protection – just like their mobile apps," said Asaf Ashkenazi, CEO at Verimatrix. "We're pleased

to serve as a silver sponsor of Black Hat USA, as the event serves as a perfect venue to announce this new partnership and the expansion of XTD's reach. By servicing both mobile apps and websites, we're playing an ever greater role in helping organizations proactively identify and shut down risks before harm is done."

"Reflectiz is a market leader in web exposure management and is very happy to partner with Verimatrix, as our two solutions truly complement each other, enabling all-encompassing security for both web and mobile," said Idan Cohen, Co Founder & CEO at Reflectiz. "Reflectiz will continue to dominate web exposure management and develop new capabilities to always be one step ahead of the next emerging threat while strengthening partnerships to provide our customers with an even broader range of solutions."
